

ALEX BOGLE

Technology Specialist (Tier 1) | IT Support | Smart Home & Network Troubleshooting

Portmore, Jamaica | +1 (876) 382-0444 | bogle.alex@hotmail.com | saintlex.sbs | github.com/SaintChris

PROFESSIONAL SUMMARY

IT Support and Operations professional with 4+ years of hands-on experience troubleshooting hardware, software, networks, consumer IoT devices, ticketing workflows, and field-support escalations. Strong fit for Technology Specialist roles requiring empathetic remote triage, clear plain-English communication, detailed diagnostic documentation, and end-to-end ownership of client outcomes. Experienced with device provisioning, router/switch validation, OS configuration, asset lifecycle management, automation, and customer-facing technical support across fast-moving environments.

CORE SKILLS

Smart Home / AV Support	Consumer electronics, IoT troubleshooting, Bluetooth/firmware issues, cameras, device setup, user education
Network & Systems Support	TCP/IP, DNS/DHCP basics, Wi-Fi diagnostics, routers, switches, Windows, macOS, Linux, device imaging
Ticket Ownership & Documentation	Diagnostic notes, CRM/ticket updates, escalation handoffs, data integrity, privacy-conscious records
Automation & Tools	Slack workflows, Google Workspace scripts, Asset Tiger CMDB, QuickBooks, Excel, Python, Bash, Docker, Grafana

PROFESSIONAL EXPERIENCE

Asset & Inventory Management Officer (Level II) / Tier 2 Tech Support | Island Networks Jamaica

Feb 2025 - Nov 2025 | Kingston, Jamaica

- Owned remote and hands-on technical triage for provisioning teams, including device imaging, OS configuration, password resets, firmware checks, and basic network troubleshooting.
- Supported field installation teams with router/switch setup, connectivity validation, hardware deployment checks, and clear escalation notes for repeatable fixes.
- Managed end-to-end lifecycle control for 6,000+ technical assets in Asset Tiger CMDB, improving audit readiness, inventory accuracy, and partner visibility.
- Reduced return-to-service lag by 35% by building structured physical triage workflows for devices requiring diagnostics, repair routing, or redeployment.
- Built Slack workflow automations for equipment logging, cutting processing time by 40% and reducing manual entry errors across hardware operations.
- Partnered with R&D teams to reproduce, document, and escalate recurring hardware, firmware, and network failure patterns with diagnostic clarity.

IT Support Technician & Customer Service Representative | Reliable Courier Jamaica

Aug 2020 - Nov 2022 | Kingston, Jamaica

- Delivered frontline support for desktop, printer, network, email, and customer-facing platform issues through phone, email, and ticket-based workflows.
- Installed, configured, and maintained routers, switches, Wi-Fi equipment, laptops, printers, and tracking hardware to minimize downtime for internal teams.
- Created a Google Sheets automation workflow that reduced daily manual processing from 7 hours to 3 hours, improving team speed and data reliability by 57%.
- Translated technical issues into clear instructions for non-technical users while maintaining accurate notes, account updates, and escalation records.
- Supported customs-processing operations in ASYCUDA World, helping data-entry teams validate digital workflows and resolve process bottlenecks.

Enterprise Technical Support Specialist - Fitbit Account | Ibex

2022 - 2023 | Kingston, Jamaica

- Troubleshoot consumer IoT hardware and app issues including Bluetooth pairing, firmware behavior, sensor data, biometrics modules, account access, and order/warranty cases.
- Managed high-volume inbound voice and email queues while documenting diagnostic steps, updating CRM records, and guiding users through plain-English resolutions.
- Explained complex device and health-metric behavior clearly to global users, balancing technical accuracy with empathy and urgency.

Administrator | Sterling Carter Technology Distributors

Feb 2026 - May 2026 | Portmore, Jamaica

- Coordinated procurement, shipping, merchandise returns, supplier documentation, and partner communication for technology distribution operations.
- Maintained structured records, operational documents, and confidential partner files while supporting business decisions for the Managing Director.

Assistant Warehouse Manager | Security Options Limited

Jan 2023 - Aug 2024 | Kingston, Jamaica

- Standardized receiving, dispatch, and inventory-control SOPs, reducing fulfillment errors by 30% and improving operational consistency.
- Used QuickBooks Enterprise and internal systems to maintain real-time inventory accuracy, reconcile discrepancies, and support audit-ready records.

Systems & Support Associate - Humana Account | Hinduja Global Solutions (HGS)

Nov 2018 - Apr 2019 | Kingston, Jamaica

- Handled sensitive customer and healthcare-provider interactions while updating enterprise CRM records, routing inquiries, and maintaining accurate account documentation.

TECHNICAL PROJECTS

Agentic AI Infrastructure Engine | github.com/SaintChris/portfolio-agentic-infra

2026 | Remote

- Built a local-first multi-agent system in Python with task delegation, evaluation logic, human-in-the-loop review queues, and a testing suite of 52 passing assertions.
- Deployed an on-device monitoring stack using Docker, Prometheus, and Grafana to track processing health and runtime metrics in a unified dashboard.

Home Lab: Linux, Containers & Observability | Independent

2024 - Present | Remote

- Administer Linux environments for staging microservices, isolating dependencies, configuring Docker Compose services, and practicing SSH access control.

CERTIFICATIONS & EDUCATION

- Google IT Support Professional Certificate | December 2025
- EF SET English Certificate - C2 Proficient, Score: 79/100 | November 2025
- University of Technology, Jamaica | Bachelor of Architecture, Core Studies - 2 Years
- Excelsior Community College | Associate of Science in Architectural Studies
